### Notes

\*) Only supported by XML-RPC

\*\*) This product has reached End Of Life (EOL)

1) MSF message with callback number. Always internally directly to the handset

2) MSF message sent to the API PC, which will redirect. E.g. the machinery is sending the messages

3) Interactive remote menu such as corporate phone book in the KIRK Wireless Server 6000 or stock management (looking for item numbers, prices etc.)

4) Callback number, Alert type control, Vibration control, and Save in Stack control

5) In/Out of charger, low battery warning, or battery status etc.

6) Send task to a predefined group. When one person accepts, the task is deleted from the other handsets

x = supported  
- = not supported
